

APPRIO

HEALTH SOLUTIONS

ABOUT APPRIO, INC.

Apprio is a leading provider of specialized technology solutions in the Health, Defense, Homeland Security and International Development markets. Apprio has substantial experience providing programs and technologies that support Interoperability, Health Information Exchange (HIE), Information Security, Credentialing and Software Engineering, among others. During the last 19 years, Apprio has cultivated trusted partnerships with government clients within Health and Human Services (HHS), Department of Homeland Security (DHS), DoD and the Veterans Affairs (VA) by hiring and retaining the most talented technology professionals in the industry.

Apprio Leading the Way in Federal Health IT

Health information technology creates efficiencies in care, eliminates redundancies and is more secure than manual processes. Apprio helps federal and state health agencies set up and manage health IT systems and programs that deliver value to the organization and to the citizens they serve.

From helping the National Disaster Medical System provide effective medical treatment during emergencies, to working with the Federal Health Architecture to create harmony among federal health IT systems throughout the government, Apprio works at the center of the federal health IT domain.

Our experienced staff has a successful track record with diverse populations and complex health IT issues. Our health services are grounded in strong technical expertise, rigorous methodology and a profound commitment to addressing our clients' challenges.

APPRIO'S HEALTH IT EXPERIENCE:

- » **Centers for Medicare and Medicaid Services (CMS):** Apprio supports CMS' effort to implement International Classification of Diseases (ICD)-10 across its infrastructure.

- » **Office of the National Coordinator for Health IT:** Apprio helps the Federal Health Architecture plan and execute activities necessary for operating a successful e-gov initiative.

- » **Federal Health Architecture:** Apprio supports the development of the Federal Health Information Model (FHIM), an enterprise architecture tool that aims to create a view of health IT investments across the federal government to allow for better planning within and between federal agencies.

- » **National Disaster Medical System:** Apprio developed the EHR (Disaster Medical Information Suite) that Health and Human Services uses for all federally declared disaster responses.

- » **U.S. Coast Guard:** Apprio developed and implemented the medical credentialing and safety components of the USCG's integrated Healthcare Information System (iHIS).

- » **CDC:** Apprio has operated the Puerto Rico Immunization Registry, which is one of many CDC supported systems to track immunizations within the United States. These systems exchange data internally and to CDC in order to provide visibility on immunization status in support of public health.

- » **Defense Health Agency (DHA - Army Reserve):** Apprio provides clinical credentialing support for all Army Reserve clinicians who comprise the majority of clinicians within the actual Army.
